

## Example Table: Densities and Speeds of Sound

TABLE 1

Experimental values of density  $\rho$  and speed of sound  $c$  at temperature  $T$ , molality  $m$ , and mass fraction  $w$ , for the system glyglyglyine peptide (1) in solutions of water (2) + glucose (3) at pressure  $p = 0.1 \text{ MPa}$ .<sup>a</sup>

$T/\text{K}$	$w_2$	$m_1$	$\rho/\text{kg}\cdot\text{m}^{-3}$	$c/\text{m}\cdot\text{s}^{-1}$

<sup>a</sup>  $w_2$  is the mass fraction of water in the (water + glucose) solutions, and  $m_1$  is the molality of glyglyglyine peptide in the (water + glucose) solvent. Standard uncertainties  $u$  are  $u(T) = 0.01 \text{ K}$ ,  $u(p) = 10 \text{ kPa}$ ,  $u(w_3) = 0.0001$ ,  $u(m_1) = 0.00002$ , and the combined expanded uncertainties  $U_c$  are  $U_c(\rho) = 0.1 \text{ kg}\cdot\text{m}^{-3}$ , and  $U_c(c) = 1 \text{ m}\cdot\text{s}^{-1}$  (level of confidence = 0.95).
